Retraction

The article 'Protective Effects of MicroRNA-126 on Human Cardiac Microvascular Endothelial Cells Against Hypoxia/Reoxygenation-Induced Injury and Inflammatory Response by Activating PI3K/Akt/eNOS Signaling Pathway' [Cell Physiol Biochem 2017;42(2): 506–518. DOI: 10.1159/000477597] by Hong-Hui Yang, Yan Chen, Chuan-Yu Gao, Zhen-Tian Cui and Jian-Min Yao has been retracted by the current and former Publishers and the Editor.

After the publication of this article, partial duplication of images within Figure 7 was identified by a reader between the miR-126 + mimic + wortmanin panel and the inhibitor-NC panels. When asked to comment on this, the corresponding author stated that none of the original data underlying the results presented in this article was available for review. As the concerns raised about the figures can not be addressed, the article has been retracted.

The authors did not respond to correspondence about this retraction."
